Feline Lifetime Wellness Plan

19203 Aurora Avenue North SHORELINE,WA
206-546-2287 (206-546-CATS)

The objectives of a wellness plan are to identify and prevent disease, enhance the quality of life, and to maximize longevity through regular physical examinations and routine screening of the body systems.

		Weeks			Mo	Years																			
COMPARATIVE AGE	Cats	8-9	10	12	4-9	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20
	Humans	← Childhood →				18	25	30	35	40	44	48	52	56	60	63	66	69	72	75	79	81	84	89	92

EXAMINATIONS

Done by a skilled professional may allow early detection of potentially deadly conditions not always evident to an owner. The AVMA is now advising twice yearly wellness examinations. At CEVC we advise annual wellness examinations until 12 years, then twice a year examinations starting at 13 years of age (medical conditions may dictate more frequent examinations.)

A = All Cats **O** = Any Outdoor Exposure

VACCINATIONS

Tailored to your cats needs based on risk factors and reliability of specific vaccinations. Vaccinations that are **NEVER** advised by CEVC due to their lack of efficacy are those against Bordatella, FIP, FIV, Giardia or Ringworm.

FeLV (Leukemia)		**O**	**O**		**O**	**O**			**O**			**O**													

DIAGNOSTIC TESTS

These non-invasive tests can often identify problems long before clinical signs appear when treatment or prevention is more feasible. They are also very useful in establishing a baseline from which we can measure changes.

CBC (Complete Blood Count)				**A**							**A**			**A**	**A**	**A**	**A**	**A**	**A**	**A**	**A**	**A**	**A**	**A**
